**HYPERSHOCK**   
**OUTER CORE**  
Patent Pending

**HyperSHOCK Technology (Patent Pending), when added to a ball's outer core, controls the influence pins have on the ball's path through the pin deck. The result is drive through the pins like no other balls on the planet.**

**HYPERSHOCK**   
**COVERSTOCK**  
Patent Pending

**HyperSHOCK has now been injected into the cover found on the original Tyrant, as well as the new Tyrant Pearl. This increases the ball's ability to retain energy as it rolls down the lane. Less energy loss, plus enhanced drive through the pins equals big performance gains.**

**Our highest performing products.  
 Full-throttle, high octane performance.**
